IT'S NOT JUST  
ABOUT THE  
BOAT

# YOU HAVE ALREADY CHOSEN THE WORLD'S BEST WAVES, WAKES AND RIDE. LET THE EVOLUTION BEGIN.

Welcome to the Centurion family. While every boat we make delivers exceptional performance, our job is to match you to the boat that suits your needs best. Our success is measured in your satisfaction.

## START HERE. HEAD DIRECTLY TO FUN.

When you pick Centurian there is no bad choice, but there are differences that will maximize your enjoyment. Knowing that exceptional performance is a given, your first decision is luxury utility or high-end sports model? The Ri Series offers high performance wrapped in a luxurious family boat. The Ri Series challenges skill levels from beginner to world champion while impressing even the most discriminating tastes. Our engineers have taken the Ri230, Ri245 and Ri265, coming in at 23, 24.5 and 26.5 feet in length respectively, and strategically innovated these dominating wake machines, down to the smallest detail. They contradict expectations because not only do they create the world's best waves, wakes and ride, but they do it while consuming less fuel and operating with a level running attitude at low noise levels. We say they embody revolution innovated (Ri) because they represent a new level of all-round excellence.

In contrast, our Fi series are purpose-built boats designed with wake making at the top of the list. They are thoroughbred sports boats through and through and their purpose is clear even on a trailer. Everything about an Fi is designed with performance front and center. That's not to say they don't include a boatload of benefits that make your life better, rather that the Fi makes no apologies for its singular purpose. These boats are not trying to be like any other boat on the market. Just like race cars designed for speed and traction, the Fi Series are designed to deliver what you need on the water. The wide-bow, sleek stature and aggressive body lines leave no doubt that the Fi Series is built for high performance wake sports, but the thoughtful features and options provide unmatched benefit to the user. The Fi23 and Fi25 are designed for high performance purposes, but they are also "benefit built" for our family of Centurions owners specifically.

# DECISIONS, DECISIONS. WE HAVE OPTIONS FOR YOU TO CONSIDER.

Choosing your boat is just step one. Next come the options. [01] Our Battle Advance tower with its sleek and aggressive styling comes standard with the Fi Series but you can opt for the Ri Series’ standard [02] DropZone Auto tower instead if you like a more pronounced look with automatic fold. The taller DropZone tower offers elevated speaker options from Roswell and Wet Sounds. Both Fi and Ri series come with a standard [03] pop-up ski pylon. Our Side by Side (SxS) HD Touch Vision screens give you instant visibility that can be expanded with an optional additional range of view (ROV) system in both series. The Ri offers a [04] REVO version with tall rectangular screens, while the Fi has a [06] PANO version with low profile screens. Both are available with the range of view (ROV) system, which gives you a front and rear view around the boat so you always know what’s going on. [05] The clamping wireless cell phone charger that comes standard in every Ri can be added as an upgrade in the Fi Series to provide handy access that will make firing up your tunes even easier. The Gussi Italia Revo Wheel (made in Italy) is a luxurious standard feature on Ris, while the sporty Fi Warrior Wheel (made in the USA) is standard for the purpose-built FIs. Both come with Billet Sport Shifters by NiceRack (made in the USA). [07] All our boats come with

built-in garbage cans for keeping your boat organized and clean, but you can choose where you want that to be based on the size of the boat you choose and the interior configuration you prefer. You even have options for seating configuration, with five different layouts available. [08] The flip-up transom stadium seating is standard on the Ri series boats but is also offered as an upgrade for [10] Fi Series boats and creates easy access to the swim step. This is a great option for people who like to take a lot of riders to watch and add weight to the back end of the boat. Need a little more security? The Ri offers black anodized PTM Billet grab handles while the Fi series offers [11] black marine coated Roswell grab handles with a black chrome decal inlay. For those who stay out on the water all day, access to cold drinks is a must. [09] Floor ice chests are standard in both series, but the Ri245 and Ri265 come with an additional 15 or 40 quart Grizzly Cooler with matching GatorStep. Picky about details? Get into the minutiae by choosing the color of stitching you want to highlight your interior. [12] Both Ri and Fi boats come with two standard upholstery accents, and you can choose the color of your Gore Tenera thread to really dress up your interior. Make your boat uniquely you.

Ri265 | TWENTY SIX FEET SIX INCHES | SEATING: YACHT CERTIFIED | FUEL: 92 GALLONS

Ri245 | TWENTY FOUR FEET SIX INCHES | SEATING: 16 PEOPLE | FUEL: 89 GALLONS

Ri230 | TWENTY THREE FEET | SEATING: 14 PEOPLE | FUEL: 81 GALLONS

# PICK THE ONE THAT FITS.

When deciding what size boat you need it's good to take a practical approach. Where will you store it? How much room do you have for a boat on a trailer? How many people do you want to take out when you hit the water and how much gear will you need to take along? Do you drive long distances and need more fuel capacity? Do you stay out all day or make frequent return trips? (This might help you decide how much cooler space you require.) Imagine your ideal day on the water

and start from there. Centurion offers options from the sleek Fi23 and slightly longer Fi25 (23 and 25 feet), to the fuller Ri Series in the Ri230, Ri245 and Ri265, (23, 24.5 and 26.5 feet in length respectively). It should be easy to determine which one works best for you. If we were to leave you with one last insight, it would be no one ever says they wish they had chosen the smaller Centurion.

Fi25 | TWENTY FIVE FEET | SEATING: 16 PEOPLE | FUEL: 92 GALLONS

Fi23 | TWENTY THREE FEET | SEATING: 14 PEOPLE | FUEL: 89 GALLONS

# MAKE ROOM FOR EVERYONE.

We're not a one-size-fits-all kind of company, so we offer multiple options to design your one-of-a-kind boat. Seating configuration is an important one. We offer five models each with unique interior configurations and a variety of customization. Once you know what model's interior is right for you, customizing it should be a breeze. You already know how many people you like to take with you and how long you like to stay on the water. With seating capacity of 14 to 16 up to the

luxurious Yacht Certified design of the R1265, our interiors work for every style and need. Go subtle or bold with your interior colors and textures, whatever reflects your personality. Add versatile slide seating with an available table and reversible lean backs or opt for flip-up stadium seating. Do you spend all day on the water? Make sure you have a large capacity in-floor ice chest. Love your tunes? Choose a Wet Sounds or Roswell sound system.

Whatever ballast options you choose, it will be balanced across the boat to eliminate bow rise and create a smooth rough-water ride. As you can see in the illustration above, we have carefully located ballast throughout the boat, from the bow to the stern. We also control the capacity of these containers, so when you fill them the hull is displaced to specifications that we designed. Other boats put 50% of the ballast or more in the stern. Because we prefer a level ride and better fuel efficiency, that's simply not possible with our system. It's not just ballast capacity that makes our boats better, it's also how that ballast is distributed.

# BALLAST IS THE SECRET TO OUR PERFECT WAVES AND WAKES.

Our ballast locations are key to our world class waves, wakes and rides. Distributed evenly from bow to stern, with more ballast located in the center of the boat than our competitors, our boats displace more water and ride more evenly on the water than others. This even distribution of weight and lower bow make our boats more fuel efficient than others. Each model has additional ballast options up to a maximum capacity. In other words, this is where you really can design the boat

you want to support the wake sports you do. Each boat we make has a maximum available ballast capacity that can be configured precisely the way you want. The addition of the optional RAMFILL<sup>2</sup> sub-floor pumped ballast (aka "The Baller") offers close to double the capacity of all the other ballast options combined. The precision with which you can dial in the wave or wake you desire is why Centurion is known for the world's best waves and wakes and ride.

The smallest of our Ri Series, the Ri230 is twenty-three feet of powerful perfection that merges the depth of the Ri Series with the sharp lines of the Fi Series in an aggressive, head-turning style. Thanks to the Opti-V running surface the Ri230 is the best of both worlds as the official tow boat of the World Wake Surfing Championship and the IWWF Wakeboard World Championships. The Centurion Opti-V Hull includes hook under the Ri230, which changes the running attitude

of the boat to get the nose down and the entire “v” of the running surface cutting through chop and/or displacing water for wake surfing and wakeboarding. The available QuickSurf Pro Surf System creates lift opposite the surfside with its long stainless-steel blades on the rear corners of the boat. With as much as 5400 pounds of available ballast the smallest of the Ri Series has generated buzz due to its remarkable ability to generate the World’s best waves even at only 23-feet.

# SMALL BOAT, BEST WAVES.

STD TORQUE	TOTAL BALLAST	FUEL CAPACITY	SEATING CAPACITY	TOTAL RAMFILL

If you are a self-defined luxury performance seeker, the Ri245 falls squarely in the target zone for your needs. This 24-foot-6-inch wake surf boat has a long pushy surf wave and a smooth rough water ride. The versatile interior has 16-person seating capacity without tradeoffs in bow rise or maneuverability. A foot and a half longer than the industry standard, the Ri245 offers up to seven precisely placed ballast locations, creating the industry's largest factory ballast capacity in a 24-foot boat, at 5650 pounds. The "Baller Ballast" system accounts for half that and fills in 90 seconds. It bolsters reliability with

2" stainless steel ball valves for all four fill and drain gates. The Opti-V hull, with its 20 degrees of deadrise, delivers a smooth rough water ride, 50% better fuel efficiency and rapidly creates well-formed waves and symmetrical wakes. The exclusive Touch Revo Side by Side 12" x 12" HD dash system offers two screens mounted side by side and working together or independently for easy control of everything at once. You can even watch your trip and fuel consumption in real time. The DropZone auto tower, custom made for Centurion by Roswell, folds up quickly and smoothly at the push of a button.

## BIG PERFORMANCE, NO TRADEOFFS.

The Centurion 26-foot-6-inch powerhouse Ri265 will boost your attitude whether you're a beginner or a seasoned champion. World Champion pros hone their skills behind the largest of the Centurion wake boats, but who knows what future dynasties are being quietly built behind this beast? After all, the Ri265 offers the longest, pushiest surf wave, a smooth rough water ride, 5850 pounds of evenly distributed ballast, yacht certified seating and versatile interior accommodation. In other words, everything you want to embrace that "go big" attitude and harness your best life. Above water you see only the aggressive styling

and chiseled lines of the Ri265, until it performs. That's when the true expression of its greatness shows, with the Opti-V running surface. The Centurion Opti-V hull includes hook, which changes the running attitude of the boat to get the nose down and the entire "v" of the running surface cutting through chop and displacing water for wake surfing and wakeboarding. With the available RAMFILL<sup>2</sup> "Baller Ballast," more than half of the Ri265s ballast fills in 90 seconds or less. The extreme reliability of its ball valves, typically reserved for yacht fuel systems, and the high performance deliver more than 50% better fuel efficiency than competitors.

Like a plane built for war, Centurion's Fi Series models are purpose built for one thing – performance. The Fi23 is designed to deliver spectacular waves and there's no mistaking that purpose even when it's sitting on a trailer. From the wide pickle fork bow to the sleek, aggressive lines and the integrated Battle Tower Advance, it's a machine that announces its purpose. Like a specialized sports car, designed to hug the curves and accelerate quickly, the Fi23 is a compact water warrior

ready to go. Seating is available for up to 14 people and the available ballast of 5250 lbs. insures you will have the right displacement for the perfect waves and wakes. The Pano SxS HD Touch Vision Dash puts the driver squarely in control and the optional Incorporated Range of View (ROV) system offers exceptional access to view everything going on without having to turn around. It's fearless innovation like this that defines the Fi Series.

When we set out to design the Fi Series our engineers weren't trying to design a boat for all people. Instead, they were singularly focused on creating the world's best waves, wakes and ride. So much so that there's zero doubt when you see the Fi25 that this 25-foot boat is built for wake surfing high performance. It's not a utility water sports boat that does a lot of different things but none well. The Fi25 is purpose built with a heavy emphasis on surfing wrapped in a unique style. And

because we want to benefit our users, it's full of thoughtful features and options for those wake warriors who plan to put in a lot of time on the water. Built to accommodate 16 people with up to 5600 lbs. available ballast, this high-performance machine will enable you to elevate your sport to the next level behind a machine that tells the world immediately that you mean business.

# WE HAVE A GIFT FOR YOU – TIME.

In today's world it can be harder than ever to find the time to relax and enjoy time on the water. We have found ways give you back time you might otherwise waste waiting. It starts with Ramfill<sup>2</sup>. With a dual intake scoop on the bottom of the boat, large air vents on the hull sides and touch screen access, you can fill your ballast as you leave the dock and head out for your day of surfing. The tanks will fill with water in as little as 90 seconds, offering you the most innovative ballast filling system in the industry. Once your ballast is filled, use the QuickSurf Pro touchscreen to adjust your waves to precisely what you want – which side of the boat, how you want the waves shaped. Even make changes mid-session. The QuickSurf Pro controls the long stain-less steel plates on either side of the boat, enabling you to shape the

wave. For a quiet experience, Centurion's Silent Stinger is a forced water induction baffle system built onto the Stinger Wake Plate to dissipate exhaust noise and interference in the water. By routing the boat's exhaust through the center wake plate, the exhaust is tumbled with water that is being forced into the Silent Stinger wake plate through a bottom-mounted induction port then directed through a series of baffles, naturally dampening overall noise. QuickSurf Pro even allows you to save surfer profiles for different riders so that once you get the waves you prefer, you don't have to go through the adjustments again. The time you save from each of these Centurion innovations combined gives you more time to have fun on the water. That's how we make life better.

# TOWER OF POWER SOUND CUSTOMIZATION AND FUNK-TION.

You like music? Of course you like music. We do too. So we offer built-in Bluetooth capabilities so you can listen to exactly the playlist you want. No matter which tower you choose, the Battle Advance Tower or the DropZone tower, available speakers envelope the entire boat in sound. The sleek, low profile Battle Advance Tower offers a more retro look with racks to hold all your gear. Standard with the Fi Series, the Battle Advance Tower by Roswell is color-matched and beautifully integrated into the overall design. The DropZone Tower folds, with its two electric linear actuators, in just 14 seconds and comes back up in 17. It offers both goofy and regular surf side tow points and the Centurion-branded hangers built into the center are perfect for organizing ropes or drying vests and towels. The optional Centurion exclusive BombShell 2.0 Strapless Swivel Racks have an adjustable clamping shell design padded in R-Flex Suspension Technology to cushion a secured surf board as wide as 23 inches. Even loaded, the racks won't obscure the drivers' view. Both towers offer integrated speaker options, and with in-screen zone control, the sound can be adjusted to reach the surfer behind the boat without overloading the sound inside the boat, making for a more enjoyable experience for everyone. Depending on which boat model you select, your optional sound system will have speakers integrated throughout the interior and with the Silent Stinger wake plate to dampen noise, you will be able to clearly hear.

# YOUR TECHNICOLOR DREAM BOAT.

Some people know before they even pick their boat model what colors they want. Some people take a while to decide. It doesn't matter which camp you're in, we have enough colors available for you to pick exactly what you want. Each of our boats is unique and each owner selects the colors that appeal to them. You might choose the colors of your favorite sports team, your alma mater, or even your house. Do you want a boat that matches your tow vehicle? It's completely up to you. So open up your imagination and take a look around. What inspires you? Do you want a boat that announces your presence, or a boat that

shows quiet confidence? Are you in love with bright colors or do you prefer subdued? There are a billion possibilities. Do you need to get a family consensus? We have samples. Take a vote. Or not. You just have to find the combination that works for you. From the upholstery to the Gatorstep flooring, you have options. Textures, accents, designs, stitching – down to the smallest details, this is your boat. That's what we mean when we say we build custom boats. No two are exactly alike because no two owners are exactly alike. You do you. We will take it from there. And when we deliver, it will be the boat of your dreams.

# ROME WASN'T BUILT IN A DAY. BUT THEY WERE LAYING BRICKS EVERY HOUR.

From the moment you place your order, our team begins the focused hand-crafting that creates the boat you want. From designing the custom GatorStep, mixing the custom colors, to applying the gel coat, to laying the resin-soaked engineered fiberglass that strengthens the hull, each of our team members has a distinct, hands-on role in making your boat. We don't have automated systems. We have talented and experienced crafts people who are proud of the work they do. They treat each boat as if they were building it for themselves.

That's why it takes 10 working days to build one boat. Speed isn't the priority – quality is. Each boat is inspected along the way to make sure it meets our quality standards. It's not unusual to find several generations from one family working in a specific area of our process. When you do good work and you take pride in what you do, why not pass on that knowledge to the next generation? That sort of institutional knowledge speaks to the value of what you get when you order a custom boat from Centurion.

# WE CARE THROUGH EVERY ASPECT OF THE BOAT BUILD.

Once the custom gel coat colors are sprayed, backed by layers of engineered fiberglass cloth, and strengthened with the stringer system, your Centurion is pulled from its mold, revealing your custom design. Our craftspeople then progress the build to a finished product that meets your specifications. The hull is flipped over for access to the Opti-V running surface so the laser-aligned underwater gear, like the rudder, prop shaft, and the tracking fin or the available Centurion Articulating Tracking System (CATS) can be installed. Next the pumped ballast pick-up through-holes and the optional RAMFILL<sup>2</sup> scoop is installed. Then your boat is flipped back over and headed for artisan assembly to receive a perfectly balanced 6-point mounted Pleasure Craft Marine Engine and available RAMFILL<sup>2</sup> stainless steel fill and drain 2" ball valves. Simultaneously, your Roswell Tower is assembled for aluminum-backed through-bolted installation. During a factory tour you would see caring people intensely focused on their role. Unlike car manufacturers who stamp out the same product through automated systems, the boats we build reflect our dedication to customization and quality craftsmanship. There are real people behind your boat. They want it to be exactly what you imagined and more. They check and double check their work. They set high expectations for themselves. Customers are like family. They want you to be pleased.

# DELIVERING THE BEST BUILT CUSTOM BOAT ON THE MARKET.

We invite all our buyers to schedule a factory tour. It's an opportunity to experience first-hand the extraordinary craftsmanship that goes into every boat we build and to see the people who skillfully assemble your custom boat. You will see our crafts people approach each job with focus and purpose. No part of the process is too small for dedicated focus, and every person wants your boat to exceed your expectations. From bonding the deck and hull to installing custom built upholstery, every detail is double checked and tested before it moves to the next phase of production. Our family of employees take great pride in the job they do, and they enjoy their work. There is satisfaction in a job well done and this

will be evident when you lay your eyes on your finished boat for the first time because when people are skilled and enjoy their work they produce better products. There are many eyes on your boat as it works its way to completion. And even though it is double and triple-checked through each step of the process, before you get the keys it will be thoroughly inspected one last time. All systems will be tested, specifications will be compared to your order to confirm everything is as you requested, and when every single thing checks out - and not before - your dream boat will be ready for you. And we can hardly wait to hear how you like it.

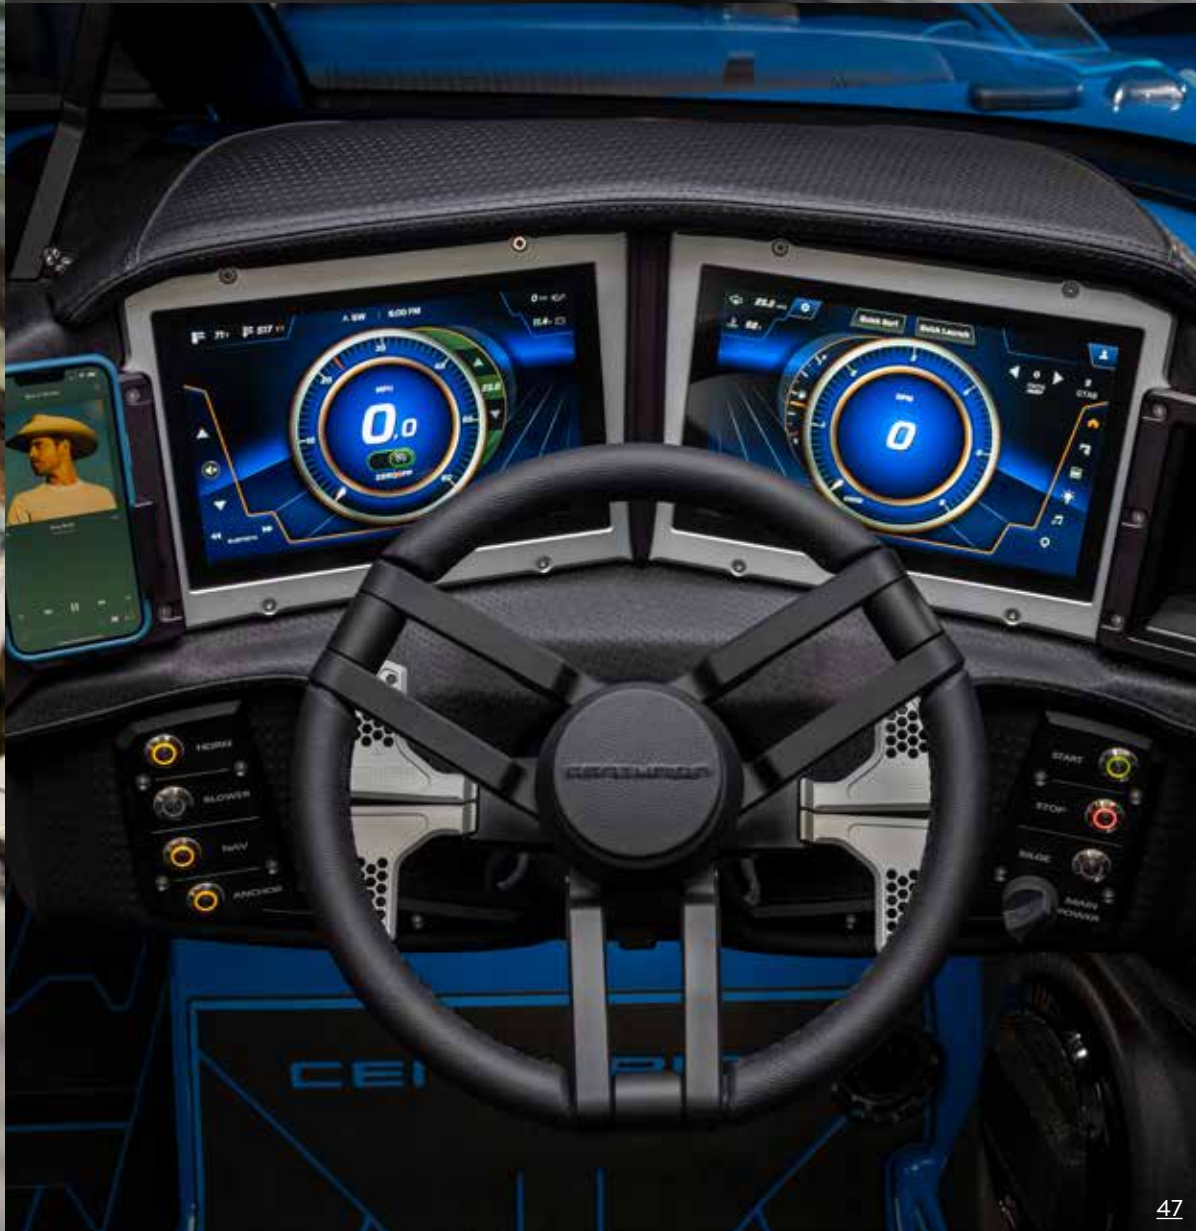

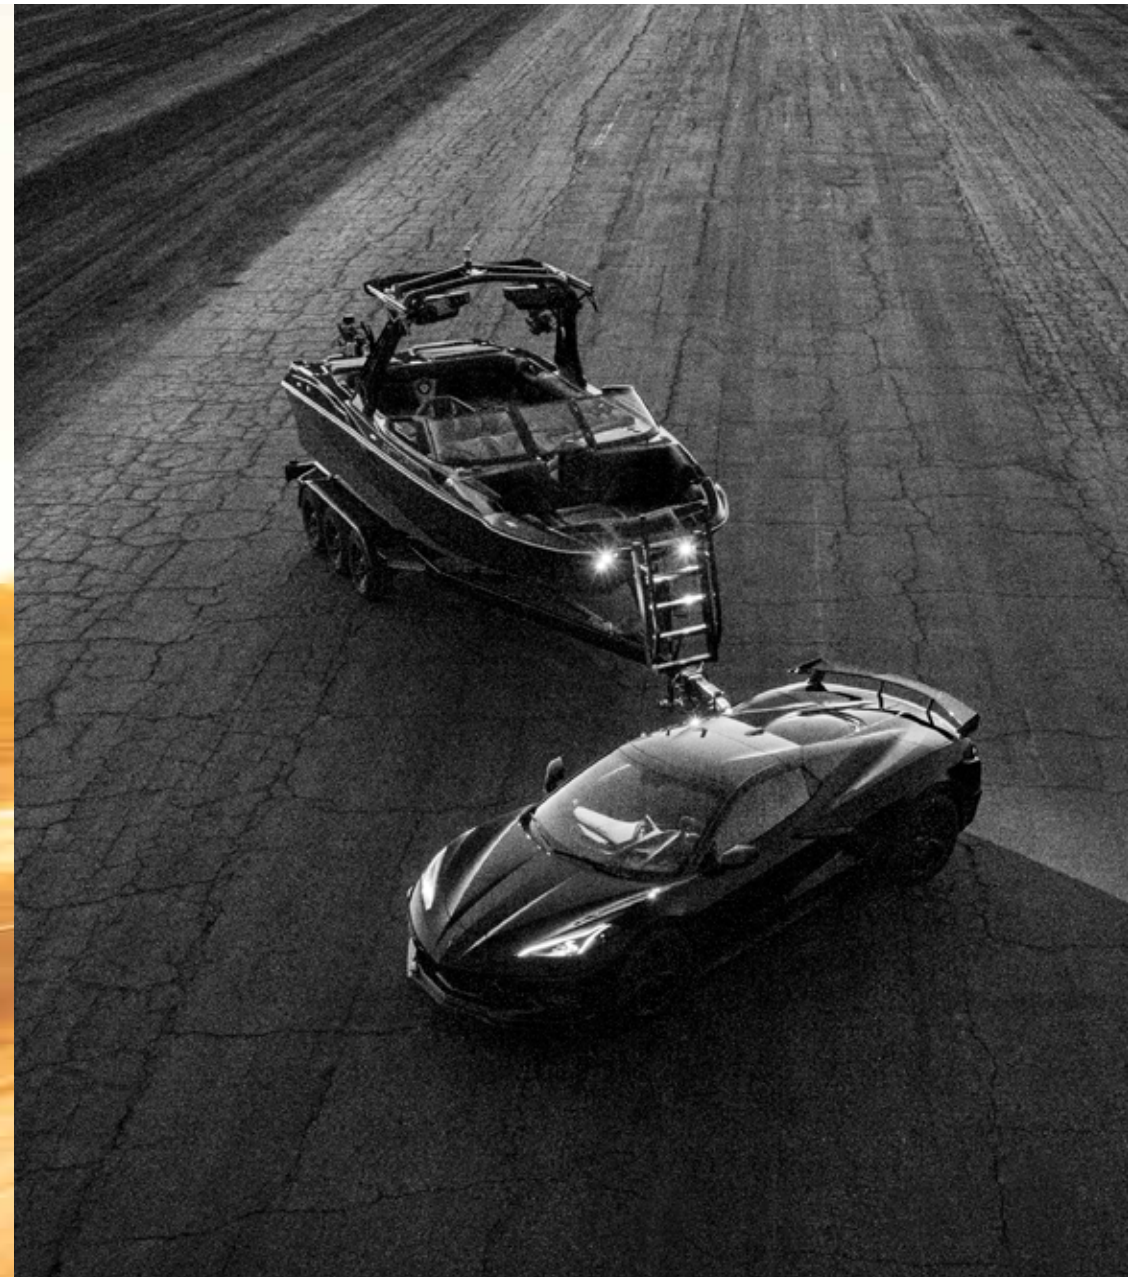

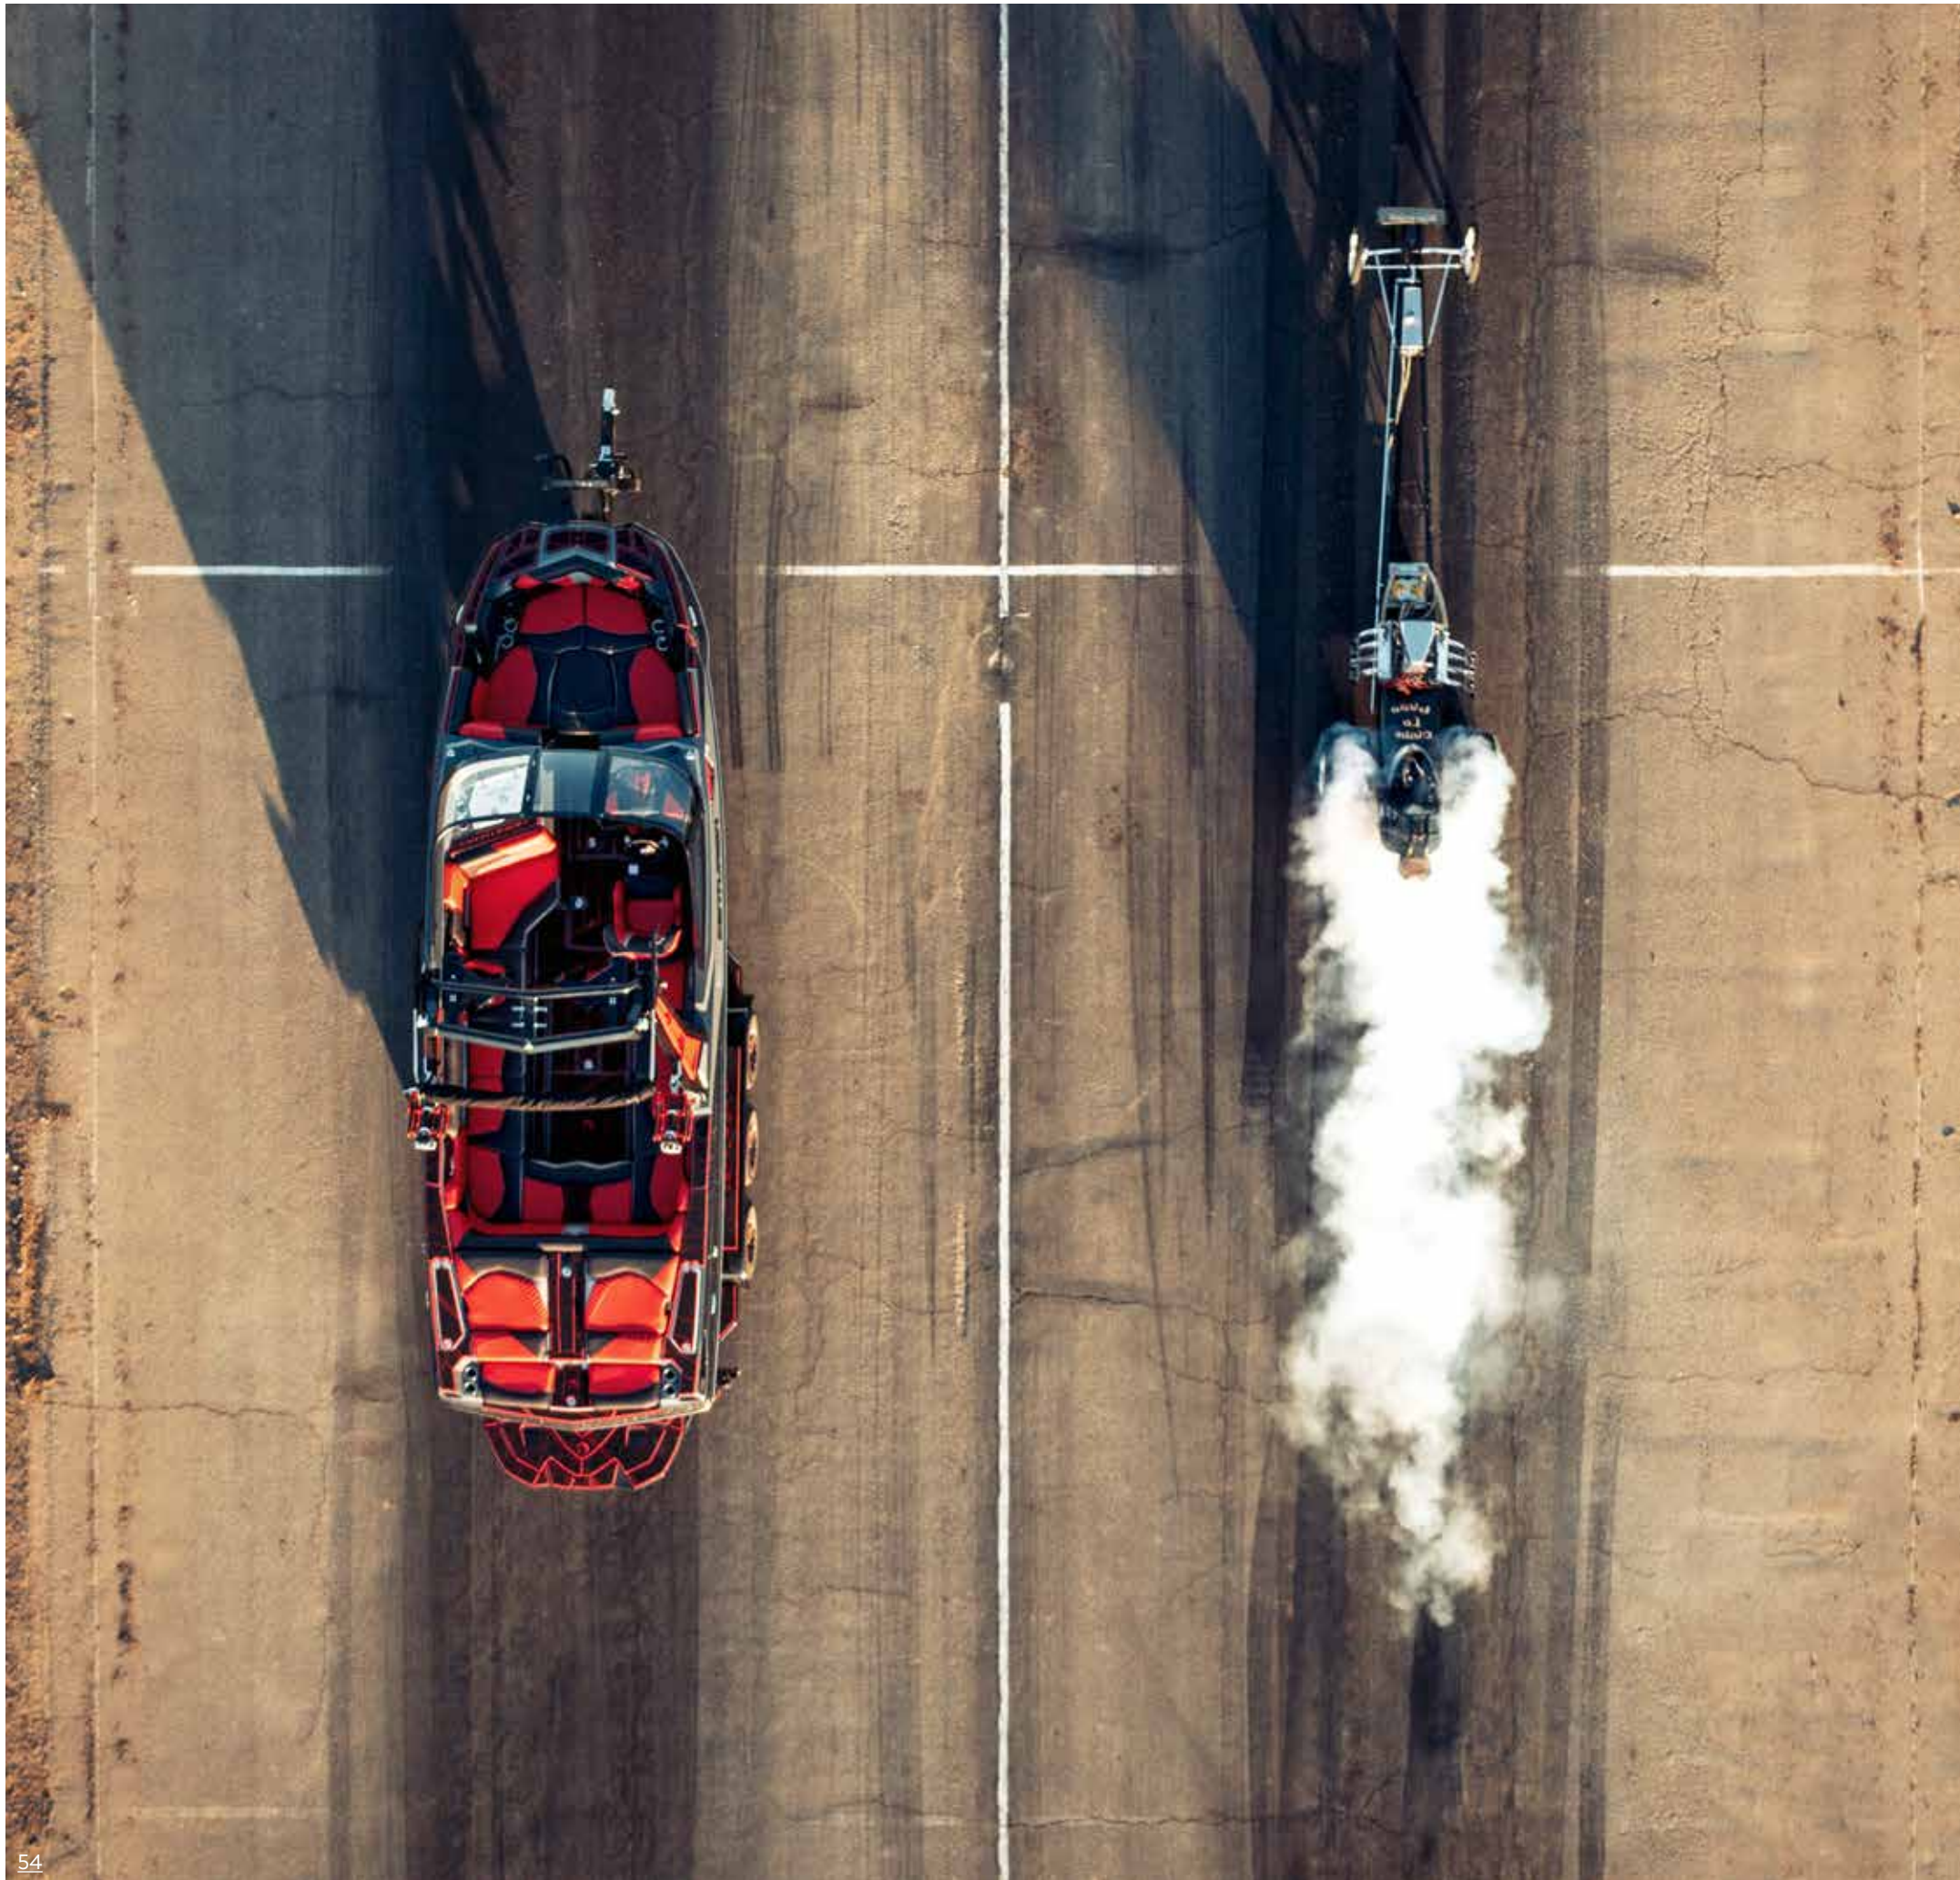

## MAKING LIFE BETTER.

As a Correct Craft Company, we build boats to the Glory of God and our best indicator of success in this charge is the reflection of God's Glory in those whose lives are made better. We strive to see people shine with that Centurion smile. Our why is creating a group of people who reflect God's Glory by continuing to make lives better for others. We build Centurion boats so we can fulfill our purpose of making lives better. It is our expression of faith, reflected in the people whose lives we touch. We don't see ourselves as just another boat builder. From the people who work here to the customers who purchase our boats and beyond, this purpose informs every interaction we have, every decision we make, from the way we work together to building better boats to sponsoring and supporting events. We don't just build boats; we build community to make lives better.

# LIFE’S MOST URGENT QUESTION, WHAT ARE YOU DOING FOR OTHERS?

Making life better is our intention, waking waves of positive change is what we do and the action behind the movements we support. We wake waves of positive change in our families, at our factory, in our community, and in our world. We want to empower our family of owner/ambassadors to wake those waves of positive change in their lives and we want to showcase those efforts. Waves of change are awakened, they’re not made. They are lying just below the surface. All it takes is something as simple and small as a single drop of water on a still, calm lake to summon a wave. We support all efforts

toward positive waves of change behind, in, and around Centurion boats. Whether it’s one person teaching another how to wakeboard, or it’s a group of 50 people going out together, an organized event or a spontaneous decision to share time on the water with one’s neighbor, every single We Wake Waves engagement makes a difference. Positive change spreads like a ripple on the water and touches untold lives. That’s what we mean by We Wake Waves. It’s not an organization, it’s actions that support our purpose to make lives better, no matter how small or large. What’s your wave? Wake it!

Photos from Operation Get Out Girl Wake Surf & Paddle Jam

# OUR HEROES ARE THOSE WHO SERVE.

Our Correct Craft company culture is charged with the purpose to Make Life Better by waking waves of positive change, but part of that responsibility is recognizing those who make our purpose possible. Centurion's support of service organizations and salute to service efforts is our opportunity to honor and show appreciation for those who currently or have served. Service members, first responders and frontline workers are our heroes. Centurion Salute to Service (S2S) recognizes these amazing individuals, their service, and sacrifices as the basis for our ability to make lives better. Without their service we would not be able to do what we do. The Centurion S2S Sales Promotion and Limited Edition Ris are a gesture of gratitude toward service men and women to improve their lives as they do ours. Beyond the

sales incentives and limited-edition boats, we support initiatives across the country, both large and small, such as Operation Get Out, Operation Wake Surf, United Heroes League, Wake The World and In His Wakes and Heddy's Water Sports, that get these heroes out on the water to enhance self-confidence, build community and create a positive sense of self-worth to those who may suffer from the trauma they have experienced in service to us. A little joy goes a long way. When we think about service men and women, veterans and first responders, we are humbled by their daily service to others and the nature of their selfless work. That's why we want to honor that service by giving something back to them.

Fineline Industries LLC reserves the right to change model specifications, standard and optional equipment, color schemes and pricing at any time without notice or incurring obligations. It is the Dealer's responsibility to adhere to all State and Local regulations and laws governing minimum requirements needed on each boat, such as trailer brakes, kill switches and other safety equipment.

THE WORLD'S BEST  
WAVES, WAKES  
AND RIDE.

Stay at least 200 feet away from shoreline, docks or other structures. Keep music at reasonable levels. Sound travels well over water. If it's loud enough to hear 80 feet back, it is likely loud enough for homeowners to hear, too. Minimize repetitive passes on any one portion of shoreline. Once you've run the same line for a while, move on to another area. Remember, you are responsible for your own wake.

For additional safety information, please visit the US Coast Guard Auxiliary at [www.cgauxed.org](http://www.cgauxed.org) or the Water Sports Industry Association at [www.wsia.net](http://www.wsia.net).

Celebrating 97 years of excellence in the marine industry, Correct Craft is a Florida-based company with global operations. Focused on "Making Life Better," the Correct Craft family includes Nautique, Centurion, Supreme, Bass Cat, Yar-Craft, SeaArk, Parker, and Bryant boat companies, Pleasure-craft Marine Engine Group, Watershed Innovation and Aktion Parks.

NMMA Certified Boats & Trailers – Tested. Inspected. Respected.

While there are many factors to consider when you are buying a new boat, choosing NMMA Certified is one of the smartest decisions you can make. Every NMMA Certified boat undergoes tough, third-party inspections to ensure it meets stringent industry safety and construction standards set by the American Boat & Yacht Council (ABYC), ultimately exceeding the minimum requirements of the U.S. Coast Guard. That means you can be confident you are buying a boat from a manufacturer that has gone the extra mile to earn the right to display the NMMA Certified logo. To learn more about NMMA Certification, visit [DiscoverBoating.com/certification](http://DiscoverBoating.com/certification).

We couldn't tell our story alone; it takes a well-rounded team to unite towards an ultimate vision. Not only does this team have to perform well on their own, they have to come together in a way that conveys a cohesive message and story. Finding a team that gels and cooperates effectively can often be an elusive goal for many companies, but for Centurion Boats this team's collaboration has resulted in Worlds best work fit for the World's best waves, wakes, and ride. We would like to thank the amazing team members who made this 2023 Centurion Boats catalog possible, our team consists of great partners, team athletes, ambassadors, and of course a dedicated family of employees.
